Paul Fretté

Applied AI & Data | Enterprise Adoption and Delivery

Near Nantes, France | paul.frette.pro@gmail.com | linkedin.com/in/paul-frette-20a74b110 | github.com/paulfrettepro-collab

SUMMARY

I help organizations adopt AI: I build RAG and AI-agent solutions, and I design and deliver GenAI adoption programs for public and private clients. Before that, seven years at Signify in enterprise accounts and product management, including a national CRM enablement program: turning a new tool into everyday use.

EXPERIENCE

Data Engineer & AI Consultant / Trainer · Data Inceptio, AI & data consultancy, Nantes — Nov 2025 – Present

- Design data architectures (ELT on GCP, Azure, AWS) and build RAG and AI-agent solutions for client organizations, mostly on an enterprise AI-agent platform.
- Designed a GenAI adoption program used to train more than 400 people; personally trained more than 160, from SME teams to the managers and directors of a French regional government (teaching quality 4.91/5 across 142 ratings, 142/142 would recommend).
- Built and run a production training-analytics app (Streamlit, Plotly, Google Sheets API) for 12 client organizations, with a Claude-powered assistant; first version built with Claude Code in two days.
- Wrote product feedback, with a working prototype, to the vendor of the AI-agent platform I teach.

Analytics Engineer / Data Architect (Freelance) · Propriétés Privées, real-estate network — Jan 2025 – Jun 2025

- Consolidated 27 heterogeneous PostgreSQL sources (1.14M rows) into a modeled Customer Data Mart for marketing automation, delivered in 30 days.
- Star schema documented in dbt; tested Airflow pipelines; Metabase dashboards; trained the marketing team.

Career transition · Nantes — 2024

- Le Wagon, Nantes: full-time Data Analytics bootcamp (Oct–Dec 2024), then Teaching Assistant (December 2024). French RNCP Level 6 qualification *Concepteur développeur en intelligence artificielle et analyse big data* (AI and big data developer, RNCP 38616), awarded January 2025.
- Renovated an apartment end to end as owner and project lead (plans, nine contractors, site follow-up); rented since 2025.

Business Analyst IoT / Product Manager · Signify (formerly Philips Lighting) — 2022 – 2023

- Owned a 631-SKU portfolio generating €41M revenue (+5% YoY): data-driven pricing, forecasting and roadmap; Power BI dashboards for leadership; 10 technical recommendations validated by R&D.

Key Account Manager (IoT) / CRM Data Analyst · Signify (formerly Philips Lighting) — 2016 – 2022

- Managed strategic major accounts (Bénéteau, BNP Paribas, Doctolib, Sodebo, Lacroix Electronics) and grew the portfolio to €3.4M revenue (+160%); C-level reporting and negotiation.
- Led the national Salesforce CRM methodology overhaul; trained 80 sales reps; ran 10 cross-functional workshops (Sales, Marketing, Support, IT).

PROJECT

Personal always-on AI agent

Public architecture: github.com/paulfrettepro-collab/personal-ai-system-showcase

- Built on Claude Code and driven by voice from Telegram since April 2026: hooks and MCP servers for mail, calendar and browser tasks, persistent memory, a watchdog and an automatic model fallback. Used daily.

SKILLS

AI & LLM: Claude API, Claude Code, MCP, RAG, AI agents, prompt and context engineering, enterprise AI-agent platforms (Swiftask, Microsoft Copilot)

Data & cloud: Python, SQL, dbt, Airflow, BigQuery, PostgreSQL, GCP, Docker, Git, GitHub Actions

Customer-facing: AI adoption programs and training design, discovery and workshop facilitation, C-level communication, change management, Salesforce CRM

EDUCATION

Master's-level degree (French RNCP Level 7), *Manager de la stratégie commerciale et marketing*, digital marketing specialization

IDRAC Business School, Nantes · 2018
