Paul Fretté

Applied AI & Data | Enterprise Adoption and Delivery

Near Nantes, France | paul.frette.pro@gmail.com | linkedin.com/in/paul-frette-20a74b110 | github.com/paulfrettepro-collab

SUMMARY

I help organizations adopt AI: I configure and deploy AI agents on an enterprise platform, build the data pipelines and internal tools around them, and I designed the GenAI adoption program that has trained more than 400 people (160+ by me). Before that, seven years at Signify in enterprise accounts and product management, including the national Salesforce CRM enablement program that turned a new tool into everyday use for 80 sales reps.

EXPERIENCE

Data Engineer & AI Consultant / Trainer · Data Inceptio, AI & data consultancy, Nantes — Nov 2025 – Present

- Design data pipelines (ELT on GCP) and configure, deploy and support RAG-based AI agents for client organizations on an enterprise AI-agent platform.
- Designed the GenAI adoption program delivered by our trainers to more than 400 people; personally trained more than 160, from SME teams to the managers and directors of a French regional government (trainer rating 4.91/5 across 142 evaluations; 142/142 would recommend the program).
- Built and operate the internal training-analytics app (Python, Streamlit, Plotly, Google Sheets API; deployed from GitHub on Streamlit Cloud) that tracks feedback from 12 client organizations, with a Claude-based assistant served through the AI-agent platform.
- Wrote product feedback to the vendor of the platform I teach, with a working prototype.

Analytics Engineer / Data Architect (Freelance) · Propriétés Privées, real-estate network — Jan 2025 – Jun 2025

- Consolidated 27 heterogeneous PostgreSQL sources (1.14M rows) into a modeled Customer Data Mart for marketing automation, delivered in 30 days.
- Star schema documented in dbt; tested Airflow pipelines; Metabase dashboards; trained the marketing team.

Career transition · Nantes — 2024

- Le Wagon, Nantes: full-time Data Analytics bootcamp (Oct–Dec 2024), then Teaching Assistant (December 2024).

Business Analyst IoT / Product Manager · Signify (formerly Philips Lighting) — 2022 – 2023

- Owned a 631-SKU portfolio generating €41M revenue (+5% YoY): data-driven pricing, forecasting and roadmap; Power BI dashboards for leadership; 10 technical recommendations validated by R&D.

Key Account Manager (IoT) / CRM Data Analyst · Signify (formerly Philips Lighting) — 2016 – 2022

- Managed strategic major accounts (Bénéteau, BNP Paribas, Doctolib, Sodebo, Lacroix Electronics) and grew the portfolio to €3.4M revenue (+160%); C-level reporting and negotiation.
- Led the national Salesforce CRM methodology overhaul; trained 80 sales reps; ran 10 cross-functional workshops (Sales, Marketing, Support, IT).

PROJECTS

Personal always-on AI agent · github.com/paulfrettepro-collab/personal-ai-system-showcase

- Built on Claude Code and driven by voice from my phone since April 2026: hooks and MCP servers for mail, calendar and browser tasks, three-layer persistent memory, an independent watchdog (15+ health checks), automatic model fallback; every incident ends in a written post-mortem (11 to date). Used daily.
- Two native macOS bricks in Swift, each with a public showcase: a floating assistant measured at 0.4–0.8 s to first token, and local-first dictation on whisper.cpp (Metal) (audio never leaves the machine), stop-to-text latency cut from 3.1 s to 1.5 s.

ELT pipeline on BigQuery · github.com/paulfrettepro-collab/battlefield_meta_aggregator

- Public code: scraping, medallion architecture, 44 dbt tests, CI/CD on GitHub Actions, zero infrastructure cost.

SKILLS

AI & LLM: Claude API, Claude Code, MCP, RAG, AI agents, prompt and context engineering, enterprise AI-agent platforms (Swiftask, Microsoft Copilot)

Data & cloud: Python, SQL, dbt, Airflow, BigQuery, PostgreSQL, GCP, Docker, Git, GitHub Actions, Swift (macOS), speech-to-text (whisper.cpp)

Customer-facing: AI adoption programs and training design, discovery and workshop facilitation, C-level communication, change management, Salesforce CRM

Languages: French (native), English (C1)

EDUCATION

AI & Big Data Developer, French RNCP Level 6 (RNCP 38616) · Le Wagon, Nantes · 2025

Master's-level degree, French RNCP Level 7, *Manager de la stratégie commerciale et marketing* · IDRAC, Nantes · 2018
